

SAND RUN PHARMACY

April Newsletter 2020

Dear Friends,

Sand Run Pharmacy is dedicated to taking extra steps to prioritizing our patient's safety during the Coronavirus outbreak. We are especially concerned with minimizing exposure to our high-risk patients, such as the elderly and the immunocompromised while we continue to meet your health care needs.

We wipe and clean our counters, cash register touchpads and front door handles on a regular schedule and as needed. We are asking all of our patients who are experiencing cough, sore throat, chest congestion, fever and/or any other flu-like symptoms **PLEASE DO NOT COME INSIDE** the pharmacy. We encourage our at risk folks, or any patients who want to minimize their potential exposure to utilize our **DELIVERY** services or our **CURBSIDE** delivery. Just give us a call and our staff will bring your prepared medications and over-the-counter items out to your car in front of the pharmacy. You can use the website www.sandrunpharmacy.com to place your prescription order or call ahead. Please provide payment information when calling ahead to expedite your pick up service. We are happy to provide medication and over-the counter item counseling over the phone for those who have any questions.

Please remember that we have a number of patients who are on immunosuppressant medications, undergoing chemotherapy and everyone's cooperation is much appreciated and vital to help protect the safety of everyone. Thank you for giving us "our space" to do our jobs to best serve you and respecting the social distancing at the counter area. By calling ahead or ordering online, your prescriptions will be ready and you will decrease your time inside the store. We would appreciate minimizing handling of your prescription bottles and medicine containers during this time. When you keep us healthy, we can keep you healthy too!

Together we will take great care of our community!

The Sand Run Pharmacy Staff

April showers bring.....
SEASONAL ALLERGIES!

There are several options to help treat seasonal allergies. The first step is to avoid the allergen as much as possible. Treatment options include doing nasal washing with a saline nose spray and taking an antihistamine medication by mouth. A corticosteroid nasal spray such as Flonase can be useful too. Antihistamine medications such as Claritin, Zyrtec, or Allegra are available in generic options as well. If you prefer a natural option, we offer **D-Hist**; a non-sedating capsule. A chewable children's tablet is also available.

Have you met Becky?

Becky is our newest certified pharmacy technician staff member and has worked in pharmacy since 2014. She graduated from Kent State University with a Bachelor's degree in Organismal Biology. Becky lives in the Highland Square neighborhood and is "Mom" to Nora the kitty. She enjoys exploring Akron area eateries and brewpubs with Evan. Please introduce yourself and help her put a name with a face.....Becky's will always have a smile on it to brighten your day!

Easter means Chocolate Easter baskets from TEMO'S Chocolates hand made in Akron. We also have an assortment of bunny cards from Recycled and Papyrus to send greetings to friends and loved ones!
