Influenza Facts

 Over 100 million work days were lost due to flu-related illnesses last year

 The flu costs businesses approximately \$10.4 billion in direct costs for hospitalizations and outpatient visits for adults.

 The flu affects 5-10% of the workforce annually

 Vaccination can decrease lost workdays by 32-45%

 For every \$1 spent by employers on vaccinations, medical costs decreased by \$3.27 and absenteeism costs fell by \$2.75

 Vaccinating the healthy workforce (age 18-64) has a direct cost savings (medical costs and absenteeism) of \$46.50 per each vaccinated employee.

 Flu vaccination compliance and engagement rates are highest when vaccinations are conveniently offered in the workplace

Why Choose Sand Run Pharmacy?

-  As an independent pharmacy, we are much more flexible than other companies and will work with you to accommodate your needs.
-  With over 10 years of experience, we can ensure to provide an efficient process that will get your employees back to work as soon as possible.
-  Our flu clinics are only operated by pharmacists specially trained and certified to provide vaccinations.
-  We will work with you to assist in any insurance issues that may arise.
-  Any special requests don't have to go through "upper management" to be approved, allowing us to respond quickly.
-  You are able speak directly with those visiting your site rather than an off site manager assigned to set up clinics for the big chain stores.
-  Sand Run Pharmacy provides everything needed for a flu clinic. All we need is a small space to set up!

Frequently Asked Questions

Q: How do I set up a flu clinic?

A: Either call us at 330-864-2138 or email us at tlamb@sandrunpharmacy.com and we will work with you to find the best date and time.

Q: Is there a minimum number needed to set up a flu clinic?

A: We ask that each clinic provide a minimum of 10 employees.

Q: Can my employees bring family to your clinic?

A: Yes. We can provide flu vaccines to those ages 14 and above. We are able to collect copays at our site by cash, check, and credit card.

Q: How does the billing process work?

A: We offer direct billing to insurance carriers for the vaccine. Most carriers cover the vaccine 100% with no co-payments or deductibles. Payments for non-covered employees may be paid by the employee at the time of service. The employer may choose to be billed for the services. Flexibility in billing allows the employer to choose how it is handled.

Q: I operate a company that has first, second, and third shift employees. How do I get all of them to get their flu shots?

A: We are willing to come to your site during shift changes to make sure all of those who want their flu shot get vaccinated.

Q: What if an employee cannot make it to the flu clinic?

A: They may stop by our pharmacy anytime and identify your business to receive their vaccine with proper billing.
